Automated Working Day Statements Now Live

April 25, 2012

As of today, April 24th, Virtual Project Manager's new module for automated Weekly Statement of Working Days is live and fully operational. VPM is excited to announce that this new feature is now available, and as always comes at NO extra cost.

How the "Weekly Statement of Working Days" module works:

- The new WSWD module works in conjunction with VPM's Daily Inspector Logs feature
- Inspectors can fill out Daily Inspector Logs in just minutes each day
- At the end of the week, VPM automatically generates a WSWD based on Daily Inspector Logs
- Save your inspectors the time and hassle
- Improve your city's organization by keeping all logs and required reports centralized and accessible with cloud technology

Virtual Project Manager unveiled this new module at their most recent quarterly user group meeting last week in La Mesa, California. With representatives from the cities of San Marcos, San Diego, La Mesa and Rancho Cucamonga in attendance, the meeting focused on several new features aimed at helping cities maximize their worker efficiency and minimize extra costs.

**Try WSWD Free for
30 DAYS!**

What is VPM?

- Unlimited users, unlimited projects and unlimited cloud storage for just \$500/month.
- Special modules designed just for municipalities like online T&M sheets and online inspector logs.
- Create, store and track daily project logs.
- Project approvals and change orders in minutes instead of days.
- Total documentation and accountability across the board.
- Frequent user group meetings to make the system improvements YOU want.

**Call (760) 249-4879
to Make an Appointment**

"As advertised, VPM has helped me to better manage projects and my staff to be more accountable."

- Jerry Dyer, City of Rancho Cucamonga
